Capstone Project

ENTRI elevate தமிழ்

Project Overview

PROJECT NAME	Job Board Platform
ASSIGNED ON	3rd Jan, 2024
DURATION	1 Month
CATEGORY	Full Stack Web Development

ENTRI elevate தமிழ்

Project Description

The job board platform helps to connect job seekers and employers. Upon completion, you will be able to contribute to building real-time dynamic and interactive applications with extensive features.

Objectives

- The dashboard platform will be highly customizable for admin, job seekers and employers.
- The employers will be able to create job listings and access candidate details.
- The job seekers will be able to view job listings, search and apply for job listings.
- The admin will be able to check, verify the employers job listings and registered job seekers details.

Features

- The platform will be accessible in Dark and Light Theme mode.
- Only authenticated users can access the platform.
- Only verified job listings will be shown on the platform.
- The platform enables the job seekers to create their profile, search and apply for job listings.
- The job seekers can upload their resume.

Future Scope

- Live Chat Support.
- Displaying Job Alerts.
- Autogenerated email responses will be shared to job seekers and employers for every job application.

Mentor Message

Hello Learners!

Congratulations on reaching this phase in your Full Stack Development Journey.

By now, you've learned the core essentials required to embark your career as a MERN Stack Developer. Now it's time to move on to the next phase which highly helps you to understand and collaborate with your team members to explore practical experience.

During this capstone project, I request you to clearly understand the project requirements and focus on the timeline with great determination. This will help you to bridge the gap between your learning and hands-on experience.

I wish you to reach out into greater heights.

Happy Coding!

Sindhu Manivannan,
Full Stack Mentor.
